Δ = today minus his season average before today, same pitch type. Flags: velo down ≥1.5 mph, IVB or HB moved ≥2 in, or release point moved ≥4 in; pitch types with fewer than 5 pitches are never flagged. Release coordinates carry park-to-park calibration error, so a release flag is a prompt to check video, not a conclusion.

Angel Genao	S	519	27%	Breaking (+1.5)	Offspeed (+0.4)	Breaking (37% whiff)

Attack / Avoid = pitch group (Fastball / Breaking / Offspeed) with the best / worst pitcher run value per 100 pitches against this hitter this season (pitcher's view, + = good for us), shrunk toward league average with a 60-pitch prior. Put-away = group with the highest shrunk whiff rate per swing.
