Michael Wacha

RHP · 32 games (32 starts) · 3,028 pitches · Mar 28 – Sep 26, 2026 regular season

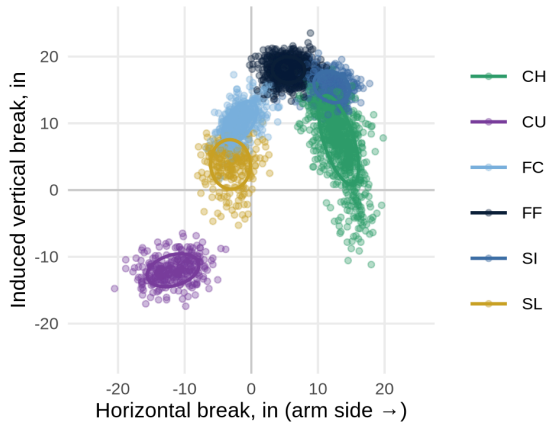

Pitcher card / game plan
Sample portfolio report by Devin Jenkinson
Data: Baseball Savant (public Statcast)

ARSENAL

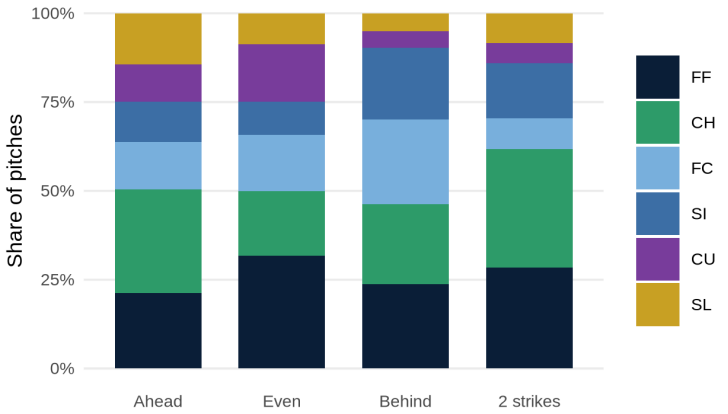

Pitch	#	Usage	Velo	Spin	IVB	HB	Ext	VAA	Whiff%	Chase%	CSW%	xwOBAcon	Stuff+
4-Seam Fastball (FF)	840	28%	93.2	2152	18.0	5.6	6.7	-5.3	20%	31%	26%	.389	97
Changeup (CH)	762	25%	80.6	1531	7.1	13.2	6.7	-8.4	28%	38%	28%	.271	114
Cutter (FC)	449	15%	89.5	2154	10.2	-1.6	6.8	-6.6	14%	25%	26%	.365	100
Sinker (SI)	413	14%	93.2	2066	15.5	11.9	6.8	-5.9	13%	25%	22%	.404	86
Curveball (CU)	301	10%	75.9	2261	-12.0	-11.7	6.6	-10.6	26%	21%	32%	.369	93
Slider (SL)	263	9%	85.0	2016	3.6	-3.1	6.8	-8.3	30%	28%	25%	.349	100

IVB/HB in inches (HB + = arm side). VAA = vertical approach angle at the front of the plate (degrees). Stuff+ = this project's physical-traits model, 100 = MLB average, 10 = 1 SD (see methods).

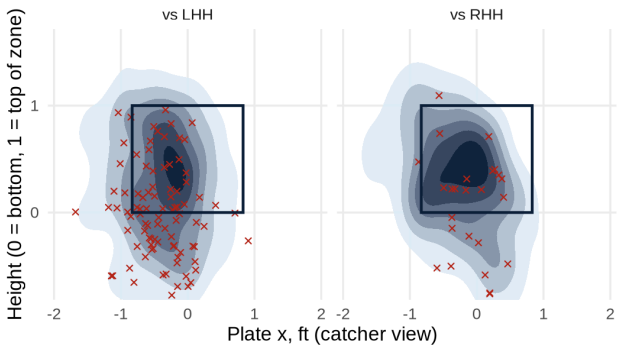

MOVEMENT PROFILE

PITCH MIX BY COUNT

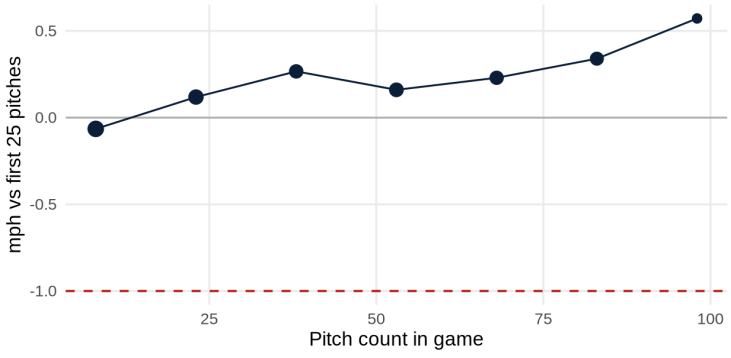

BEST PITCH: WHERE IT LANDS (BY BATTER SIDE)

CH; red x = whiff

FASTBALL VELO BY PITCH COUNT

FF + SI, games with 70+ pitches; dashed = -1 mph

GAME PLAN (AUTO-GENERATED FROM THE DATA ABOVE)

- **Best pitch by shape:** the changeup grades 114 Stuff+ and is thrown 25% of the time (28% whiff rate on swings).
- **Put-away pitch:** with two strikes the changeup gets 27% whiffs per swing (194 swings) and makes up 33% of two-strike pitches.
- **Fastball height:** 58% of his 4-seam fastballs finish in the top third of the zone; whiff rate there is 26% vs 7% in the bottom third (VAA -5.3°).

Source: Baseball Savant Statcast search (baseballsavant.mlb.com), MLB regular season pitch-level data, processed with DuckDB SQL + R (xgboost). Independent portfolio sample: not produced by or affiliated with any MLB club. Rates under ~50 swings are noisy; Stuff+ is shape-only and regressed by design.
